

# Connect ADP® to Your HR Systems to Save Time and Money

With new B2B Connectors from Modulus Data available on the ADP Marketplace, ADP clients can now connect their Applicant Tracking System (ATS) or Core HR System to ADP Workforce Now® and ADP Vantage HCM®.

Create more efficiencies with your HR processes by sending employee data (such as new hire or terminations) automatically, in near-real-time from one system to the other.

HR professionals are busy. They want to avoid double-data entry between systems. This is achievable with solutions that are integrated.

## Quick Data Integration Overview

### How is data integrated?

Through the ADP Marketplace, Modulus Data's Connector provides an API to API connection allowing for near-real-time data integration.\* For example, when employee data changes in one system, it gets automatically updated in ADP Workforce Now or ADP Vantage HCM.

### What data gets integrated?

ADP customers have two main requests: They want **data pushed** from their ATS or Core HR system into ADP Workforce Now or ADP Vantage HCM and **data pulled** from ADP into their Core HR and ATS system.

Here are types of data that are integrated.

**1. New Hire Data.** As soon as a customer pushes the hire button in their ATS, this creates a new employee record in ADP Workforce Now or ADP Vantage HCM with all the relevant data mapped for name, address, social security number, and salary.

**2. Foundational Data/Core HR System Data.** This means that company locations, departments, legal entities, job codes, and job titles from ADP Workforce Now and ADP Vantage HCM can be automatically replicated in their integrated ATS. This way, when recruiters and hiring managers log in to their ATS, they see company

\* Currently available for Bamboo HR, Greenhouse, Oracle HCM Cloud, Taleo, and Workday.

structures they recognize and can go to work immediately on a particular job in a particular office location.

### How does an ADP client get a prebuilt connector?

Through the ADP Marketplace clients can purchase a Modulus Data prebuilt connector. Clients can contact Modulus Data with questions about integration prior to making a purchase.

### Who is Modulus Data and how do they handle integration?

Modulus Data is a recognized expert in data integration for HR applications. They have a Integration Platform as a Service (iPaaS) solution, Modulus Connect, and are one of the leading sellers of ATS and Core HR connectors for ADP.

### How fast is integration between ADP and other systems?

Total integration time is usually 4 weeks including testing in a trial environment, and a go-live launch, which is handled by Modulus Data.

**Prebuilt Connectors for ADP are available at the following links:**
