

Connect Monster to Any ATS to Increase Job Applications

The Monster integration with any ATS from Modulus Data **dramatically improves recruiting ROI** and **eliminates an average of 20-minutes per candidate** of manual data entry.

Monster with any ATS Integration Overview

To dramatically reduce application drop-offs and time-consuming manual data entry, each Monster to ATS Integration solves the following use case:

1 Automatically posts an open job requisition from your ATS to Monster.com with a job tracking code. This job tracking code is tied to your internal ATS and job requisition number so that completed candidate applications can be automatically imported into your ATS.

2 Automatically pushes candidate applications completed using Monster Easy Apply into your ATS. This integration includes candidate data, resume, cover letter, and answers to prescreening questions specific to each job requisition. Imported candidate applications are automatically assigned to their designated job requisition number.

This Monster to any ATS integration eliminates an average of 20-minutes per candidate of manual data entry.

No Internal IT Resources Needed

Modulus Data knows that HRIT resources are limited. That's why our experts have created a turnkey integration between Monster and any ATS. No internal IT resources are needed to create and maintain a Monster to any ATS integration. Using

prebuilt connectors, our experts handle all the set-up and maintenance.

If a custom integration is needed to meet your unique business requirements, Modulus Data's integration experts do that work too.

Case Study: Save Time and Money with the Monster Integration

The Monster with any ATS integration streamlines HR recruitment processes and frees an HR professional to work strategically instead of manually inputting data. In companies where an HR recruiter works 10 jobs a month, a full-time employee typically is spared two weeks a month of manual data entry.

What Monster to ATS connectors are currently available?

- ✔ Monster with Greenhouse
- ✔ Monster with Taleo Business
- ✔ Monster with Taleo Enterprise
- ✔ Monster with Any ATS*

*Modulus Data can build any integration with Monster that you require.

What's included in this Monster to any ATS Integration?

All Monster to any ATS connectors come in two flavors: A turnkey integration that meets the most common use case and a custom integration that's tailored to meet your specific needs.

The turnkey integration includes:

- ✔ Job requisition posting from the ATS to Monster

Returning from Monster:

- ✔ Candidate data
- ✔ Resume
- ✔ Cover letter
- ✔ Answers to Monster general questions as well as enhanced questions that most companies would like to know (questions created by Monster and Modulus Data)
- ✔ Answers to prescreening questions specific to each job requisition (questions created in your ATS)

The custom connector allows:

- ✔ Changes to enhanced questions

How fast is integration between Monster and an ATS?

Total integration time to set-up a turnkey integration is 2-4 weeks. Custom integration or creation of a new prebuilt connector takes 6-9 weeks including testing in a trial environment, and a go-live launch, which is handled by Modulus Data.

When experts connect data, you have peace of mind.
